ABSTRACT

This trend data book addresses integral areas of New York's Mohawk Valley Community College (MVCC), including Enrollment, Admissions, Academic Programs, Graduate/Placement, Administrative/Financial Statistics and Personnel Data. Analyzing statistics gathered from fall 1988 through fall 1993, the book contains six diverse statistical reports. The Enrollment section contains information on student headcount, Full Time Equivalency (FTE), gender and age, credit course enrollment categorized by race and ethnicity, geographic origins, population, top feeder high schools, graduate projections, ACT results, and undergraduate enrollment. The Admissions section describes data on new, first-time, and transfer students. The Academic Programs section discusses annual enrollment trends by degree and certificate programs, total headcount, and percentage of total headcount and FTE. The Graduation/Placement section includes information on degrees granted, a college transfer and job placement summary by degree programs, and the persistence of all transfer students from MVCC to the State University of New York. The Administrative/Financial Statistics section contains charts outlining the financial aid summary and total allocation by government program source, as well as trends in MVCC annual operating revenues and costs. Finally, the Personnel Data section provides employee information regarding full- and part-time status, and faculty and support staff gender and ethnicity. (AS)

*Due to Federal government directives being imposed as a joint requirement and issued by the Equal Employment Opportunity Commission (EEOC), the Office for Civil Rights and the National Center for Education Statistics in the United States Department of Education, and the Office of Federal Contract Compliance Programs in the United States Department of Labor during 1989 and 1991, as amended during 1993, these statistics are reported every two-years and during the Fall. The data also includes new full-time hires between July 1 and September 30 and can't be considered as the same statistics reported hither to and appearing on page(s) 150-64. Further note: These Federally mandated reporting requirements were deregulated in 1993 and these statistics as well are also reflective as being different from the data on pages 150-64. The statistics appearing on pages 150-64 are reported annually in the Fall and are mandated by New York State. Finally, the 1995 statistics are not weighed the same, as either in 1989, 1991, or 1993 and exhibit the requirements being set by the Middle States Association of Colleges and Schools.
